

## ENSEARCH asked to look into waste discharge for island, villages in Sabah

KOTA KINABALU: The Sabah Chapter of the Environmental Management and Research Association (ENSEARCH) of Malaysia was asked to look into the feasibilities of renewable energy projects for island and villages in Sabah and to achieve zero waste discharge for the islands.

This was suggested by the Sabah Tourism, Culture and Environment Minister Datuk Masidi Manjun during a courtesy call made by ENSEARCH Sabah committee

members led by its Chairman, Datuk Adeline Leong, recently.

Datuk Adeline briefed the minister about ENSEARCH which is a non-profit organisation. Professionals, students and people with interest in learning and promoting effective ways to manage the impacts of human activities on the environment and the members of ENSEARCH believed that all were responsible for managing and mitigating the impacts of their corporate, professional and

daily living activities on the environment.

She said one the core activities of ENSEARCH was building national capacity in environmental management through the Training and Education Programmes and another core activity was to promote and advance the practice of environmental professionalism by all professionals engaged in the provision of environmental management-related services, such as environmental impact assessments,

environmental management systems, environmental audits and environmental tech-

nology.

“ENSEARCH is able to act as environmental think

tank for the government on Environmental issues” said Datuk Adeline. – PR
