

## *KKEF Young Environmentalist Internship Award 2008 Recipient*

### **Mr. Joel Lawrence Jayasunthar**

Internship to: Centre for Environment Education, New Delhi, India

Title of Paper: Sustainability Education in Resource Management

Joel Lawrence Jayasunthar has been actively involved in the environmental field for the past 8 years as a Graduate Engineer, Process Engineer, EIA Consultant and now Lead Consultant. He has led teams of environmental consultants and engineers in undertaking environmental and engineering related works.

Joel has a MBA in Business Management (University of New England, Australia) and a Degree in Environmental Engineering from University of Malaya. Some of the key projects that he has been involved in are the Kg. Bohol and Beroga Thermal Treatment Plant Projects, the construction of the Kuantan-Kerteh Railway line, the JBIC Study on Project Identification for the Sewerage Sector and the Audit and Assessment of the Physical Infrastructure and Computerisation of 500 Secondary and Primary Schools in the northern region of Peninsular Malaysia.

Joel has also been involved in a voluntary capacity in various social responsibility endeavours including being a voluntary presenter and speaker for the National Service Trainees. Joel's submission essay, aptly entitled "Our Environment – Last Chance Saloon", challenges each and every one of us to use our power of making decisions to choose the more environmental-friendly way in our daily actions.
